

The Township of The Archipelago

Information Report to Council

Report No.: Connectivity 2023-10

Date: October 12, 2023

Originator: Joe Villeneuve, Manager of Corporate Services

Glen Barnden, Connectivity Advisor

Subject: Connectivity – Activity Report

BACKGROUND

Ongoing activities related to the *Province's Accelerated High Speed Internet Program (AHSIP)* for application-based Designated Broadband Projects which will support the government's commitment of providing access to high-speed internet to every region of Ontario by the end of 2025. Note: within the Township of The Archipelago projects will be undertaken by Bell.

Designated Broadband Projects have been created with the goal for everyone in Ontario to have access to reliable highspeed internet connections at home, work, and in our communities. Supported by legislative and regulatory changes and backed by a nearly \$4 billion investment, the projects seek to solve the challenge of inadequate access to broadband by working closely with stakeholders and making legislative and regulatory changes to ensure that broadband connectivity can be achieved. This is an exciting step forward to support the objective of expanding the reach, quality, and connectivity of high-speed internet to all Ontarians.

Infrastructure Ontario (IO) is working closely with the Ministry of Infrastructure to support delivery of the projects and working with stakeholders to accelerate broadband infrastructure deployment. Partners involved in application-based designated broadband projects are being coordinated through IO's Technical Assistance Team to work together to enable connectivity in an expedient way.

OCTOBER INTERIM

- 1) The Province has launched the interactive Ontario High-Speed Internet Access Map - <https://www.ontario.ca/page/ontario-connects-making-high-speed-internet-accessible-in-every-community> and the Broadband One Window - <https://aship-landing-bow2.hub.arcgis.com/pages/broadband-one-window> . Staff participated in several workshop webinars to engage in the upcoming uses of these resources with both Bell and Provincial staff associated with the Accelerated High Speed Internet Program (ASHIP) outcomes.

2) Bell's primary contractor (Pickard Construction) has engaged with Archipelago and Seguin municipal staff and all parties have begun important dialogue around the scope of work starting in the respective municipalities.

3) Staff have arranged meetings with regional connectivity advocates - Blue Sky Net - to debrief on working happening across the region and to engage on collective interests to pursue connectivity solutions for AHSIP "out-of-scope" areas.

4) Staff are pursuing Infrastructure Ontario representatives to request a meeting regarding the interests for residents not included (out of scope) in the Provincial government's AHSIP funding.

5) Staff continue to work with all area ISPs to evaluate connectivity interests.

NEXT STEPS ON GOING

Staff continue to update the Township website – Connectivity page – with updates and pertinent information relating to the activities referenced in this report.

Also, analysis of the AHSIP in-scope/out-of-scope properties continues with the intent to engage Infrastructure Ontario with interests to fund projects that provide internet solutions to all properties in the township.

Efforts continue to review potential infrastructure/assets in the township with the intent to leverage resources and engage ISPs to advance services and solutions that increase the connectivity possibilities and choices for our residents.

Respectfully Submitted,

Joe Villeneuve
Manager of Corporate Services

Glen Barnden
Connectivity Advisor
